

Control Measures to Reduce Risk of Transmission of Covid-19

Follow public health advice on testing, self-isolation and managing confirmed cases of COVID-19. Ensure good hygiene for everyone.

Maintain appropriate cleaning regimes. Keep occupied spaces well ventilated.

Follow public health advice on testing, self-isolation and managing confirmed cases of COVID-19.

- We strongly advise all adults in our community to receive Covid19 vaccinations.
- Testing will no longer be free of charge in the UK from 1st April 2022.
- Adults with the symptoms of a respiratory infection, and who have a high temperature or feel unwell, should try to stay at home and avoid contact with other people until they feel well enough to resume normal activities and they no longer have a high temperature.
Children and young people who are unwell and have a high temperature should stay at home and avoid contact with other people. They can go back to school, college or childcare when they no longer have a high temperature, and they are well enough to attend.
- Adults with a positive Covid-19 test (brought or free LFD test) result should try to stay at home and avoid contact with other people for 5 days, which is when they are most infectious.
- For children and young people aged 18 and under, the advice will be 3 days
- If a child has Covid-19 and they are well enough to complete school work at home, parents are asked to liaise with their class teacher so that remote education can commence.
- We will be following the advice of Somerset Public Health or DFE if we have an outbreak of suspected Covid19.

Ensure good hygiene for everyone

- Catch it Bin it Kill it promoted throughout the school. – This is essential.
- Children/adults including visitors sanitise hands before eating and at times appropriate through the day. Guided handwashing for all KS1 and EYFS pupils.
- Masks for adults are optional in and around the school.

Keep occupied spaces well ventilated.

- Monitor CO2 levels throughout the school.
- Assemblies in person.
- Events in person.
- Classrooms are aired and windows and doors are opened to allow air to flow through.
- Although ventilation is important, people should be comfortable and warm.

Maintain appropriate cleaning regimes.

- The dining room is well ventilated with cleaning between sittings.
- Usual cleaning after school by cleaning team.
